

Update Item – Utility Rate Adjustment Update

The Westfield City Council unanimously approved the Water Rate Adjustment Ordinance 12-01 and the Wastewater Rate Adjustment Ordinance 12-02 on March 12, 2012 at their regularly scheduled meeting. With valuable input from the City Council Finance Committee, the City Council members and input from the Public, various improvements were made to the rate structures for both the water and wastewater rate structures. For example, a sewer summer savings plan was implemented on the wastewater rate structure and a green rate model was implemented on the water rate structure.

These ordinances are in effect and will appear on a rate payer's bill in May, which is the first full month of usage after the adoption of these ordinances.
