Subject: Appeal of Notice of Violation

Dear Westfield Public Works Department,

We received an e-mail of a Notice of Violation. We have been working in Westfield since 2008 and have never had an issue with washing out paint into a stream, lake or any other natural water source. We would never allow washing out paint into a lake as stated in the Violation. As a company we discuss proper disposal of paint periodically. We sometimes gather water using a bucket to take back to a home that is under construction, but would never allow “washing out” in a lake.

We would like to appeal the claim that we had washed paint into the lake at Oak Manor. We have spoken to our employees they have denied washing any paint into the lake.

We support 100% in keeping natural water areas clean and free from pollution. The evidence we feel was not clear on what the substance was or who disposed it into the lake.

Regards,

*Juan Gomez*
