Customer would be responsible for unloading and placing material in play area from a flat bed truck, price includes freight, black color	\$13,750.00
OR		
1 lot	Rubber Mulch Product ½” playground safety surfacing to cover two play areas (54’x50’ and 30’x28’) approximately a total of 3,540 square feet at a depth of 4” and a total of 35,000lbs. Price includes delivery by dump truck off loaded on site but spread out by customer, black color	\$11,660.00
OR		
1 lot	Unity Creations rubber tiles 44”x22” – 2-1/2” thick Play-Land to cover large playground area 54’x50’ in standard colors of red or green or combination of standard colors includes freight, landscape fabric, and glue. Also includes 1-3/4” thick Play-Land to cover small playground area 30’x28’ in standard colors	\$27,875.00

For all of the installations you will need to put a wood or plastic border around the play areas that would be level with the concrete shelter pad and concrete walk. Wood border should be treated 4”x6” (or 6”x6”) timbers (you would need 25 timbers). The timbers would be trenched in around the play area and back filled. In the playground you would need to level the existing wood mulch to a 4” or 6” depth and put down filter fabric once the area has been leveled and in the case of the loose rubber mulch put the rubber mulch in the area and level it out.

Page Two

In the case of rubber tiles you would need to remove the existing wood mulch to a depth in the large play area to a depth of 6-1/4" and back fill with 4" of a compactable stone (number 8's or 53's), in the small area you would need to level the mulch to a depth of 5-3/4" and put in 4" of a compactable stone a total of about 65 tons of stone would be needed. The stone would need to be leveled and compacted. The tiles would be glued down over filter fabric. Some cutting of the tiles would occur during the installation.

On any of the above installation Lester Recreation would provide onsite assistance in the layout of the wood border and filter fabric if you purchase rubber mulch. If you purchase the rubber tiles Lester Recreation would provide onsite assistance in the layout of the wood border, removal and leveling of the existing surfacing and installation of the rubber tile over the filter fabric.

Terms and Condition

If this quote is acceptable please make your purchase order out to **Lester Recreation Designs** at the above address. Any sales taxes imposed by any state are extra and not included; please provide your tax exempt number, if applicable. Color selection is from the manufacturers' standard color(s) available in their current catalog. Custom colors can incur an up charge, please call for pricing. Delivery time is noted on our quote if it is different than the normal 6-7 weeks, but will depend on our receipt of down payment (if required), your complete Purchase Order, and signed approved shop drawings (if required). **Installation is not included unless noted above. Receiving, unloading, and storage of equipment are the buyer's responsibility and not included. Please note that shipping packages are usually heavy, awkward and may require mechanical handling to accomplish unloading at your site or the destination. A restocking fee will be assessed on all cancelled orders. This quote is valid until the date indicated above and is subject to our confirmation thereafter. Freight charges are subject to change depending upon the time an order is placed. You will be charge the actual freight charges at the time of the order.**
