

## **Action Item # 2 Ordinance 08-50 Traffic Regulations Update**

The Westfield Public Works Department is recommending that the Board of Public Works and Safety consider the following Ordinance 08-48, Traffic Regulations for update.

The Westfield Public Works Department has reviewed and updated Ordinance 07-12, Traffic Regulations Ordinance. The update of this ordinance consists of adding the new streets, along with the associated traffic regulation signs associated with these streets, which have been added to the city's road inventory or modified since the last update.

The update of this ordinance is important for the enforcement of these regulations and the certification of the road inventory to the State of Indiana for the appropriation of the Local Road and Street funds.

The Westfield Public Works Department introduced Ordinance 08-48 to the Westfield City Council for a first reading at the November 10, 2008 City Council meeting.

The Westfield Public Works Geographical Information Systems, Transportation, and Engineering Divisions has reviewed the proposed updates and the Westfield Public Works Department recommends that these updates be forwarded to the Westfield City Council for a second reading, consideration, and possible adoption at the December 8, 2008 Council Meeting.
