

# Westfield Parks and Recreation

## Monthly Report

April 11, 2008

In March, we completed our Gym and Swim program. We ended with a good number of attendees at our Gym and Swim this season and look forward to beginning again in October. Our Start Smart Sports program has proven to be very popular. We have had to add classes for Baseball and Soccer. We are continuing to accept registrations for Football, Basketball and Golf.

The Monon Trail project is ongoing. The final drawings will go to INDOT in May. Our property acquisition has gone well, we have had to file condemnation on two properties, this is out of the 44 properties we had to acquire.

I have begun working on our Arbor Day activities. We will be planting some trees at Quaker Park and having our annual tree give away in conjunction with the Historical Society's Grand Opening.

We have begun our spring clean up and early spring projects. We have been able to work on areas that need turf improvement so that our parks have proper grass coverage. We are also concentrating on trees and tree replacement in the next month. We hope to add several trees to our properties and replace trees that have died and been removed.
