How To make an address list using the flex map:

1. Go to www.maps.westfield.in.gov
2. Turn on the Address points – under more:

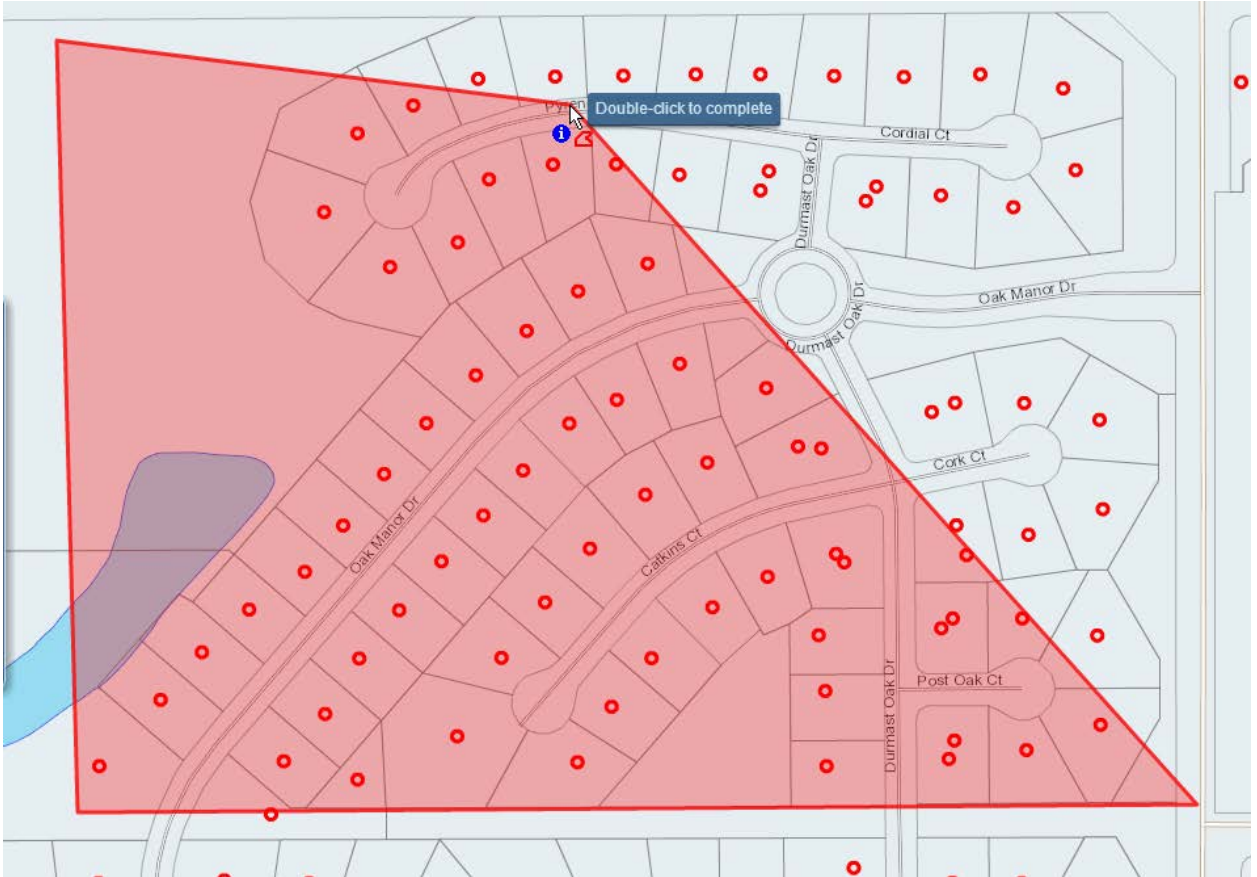

3. Click on the "identify" widget

4. Choose the shape that you would like to identify by – in this case – polygon:

5. Choose Address points:

6. Then – click on the map to start drawing and double click to complete the polygon:

7. Click on the green – results grid and export to csv.

8. Save your file to a location and then open up excel. You can open up a .csv file in excel by changing the file type to "All".

1.
